

Testimony of **Thomas Albuquerque**, Indian Participant, after his training at the 3rd International TBIC hold from 11-15th March 2013

Dear Dr.Francine,

“...I do remember all of you and Rwanda. I must tell you that the One week of Training in Kigali has really changed me a lot in my Profession. After I returned back from Kigali I was back here Implementing Infection Control Measures as per the guidelines, but with more confidence and with the ability to justify my actions in a very rational manner. I was invited to be a Facilitator for a Workshop on Airborne infection control that was held from the 4th to the 7th of April 2013. I did 3 presentations on TB Infection Control and also conducted the Mask Fit Test. This workshop was organized by the Municipal Corporation of Bombay and I was awarded a Certificate as a Facilitator. I thought of you all because I have achieved this in a very short time after my return from Kigali. I have now been requested by the Bombay Municipal Corporation to jointly do an Assessment of all the Municipal Hospitals in Bombay along with their IC Consultant Dr. Dyson who has also been trained by Dr.Paul Jensen in Harvard. ...”

Thank you

Best Regards

Thomas Albuquerque
